To whom it may concern

Dear Sir/Madam,

Attached below is the Testimonial

Without an CFO, I struggled managing the business, projects and reporting to various parties including shareholders. At the same time, it was certainly challenging, for a Group such as ours which was in the early stage of Commercialisation, to hire a CFO therefore, we did not deliver standards as we should have done. Spotting the CFO Centre was a great relieve. It made it possible to have our own CFO with Ms Fawziah and expanding our businesses internationally.

Fawziah was able to quickly understand the business and finance needs of the Holding company and the 3 main subsidiary companies. Fawziah also worked very closely with the Management Team of the Subsidiary companies to discuss the business needs and come up with Long Term Projections which helped us to better understand the Operational and Funding Needs of the Business.

Fawziah came up with SOPs or led the discussion for the SOPs like Signing Mandate, Closing Timeline, Capitalisation of Intangible, Workflow of Finance Department to better improve the internal controls and to standardise Processes. Fawziah ensured that the Accounting Team work efficiently by Streamlining and Standardising the Work Processes.

Fawziah helped to allocate cost fairly among Group companies via an improve Management Fee Agreement.

My Team was able to call Fawziah anytime to check with her on any financial implications on new contracts or business arrangements.

With the help of the CFO Centre, I was able to focus on building up the business knowing our books are all in order.
